## License Manager mini-installation for Account Administrators

Stephen Pienaar - 2020-04-16 - 0 Comments - in License Issues

**License Manager** is also available as a web application at <https://lm.prokon.com>. The web application is undergoing development, so you will find that some features are not yet available.

**License Manager** is bundled with PROKON Structural Analysis and with the Autodesk extensions ProDESK, AutoPadds, ProBAR and ProNET. The Account Administrator is often not a PROKON user himself and may prefer to not perform a full program installation to be able to use **License Manager**. If so, a mini-installation is possible:

- Create a Prokon folder somewhere. Under the Prokon folder, create two sub-folders named Bin and Help.
- Download the License Manager update package from <https://download.prokon.com/LM.zip> and unzip it to the Bin folder.
- Run \Prokon\Bin\LicenseManager.exe. On the first run, it will download and install the help file to the \Prokon\Help folder.
